DALL Commercial WOODEN REELS AND INDUSTRIAL PACKAGING

Background

DALL is the leading company in Latin America in the production of wooden railroad ties.

We are suppliers to all railroads and track contractors in Mexico.

Products

Wooden Ties

Crossties and switch ties for the railroad industry.

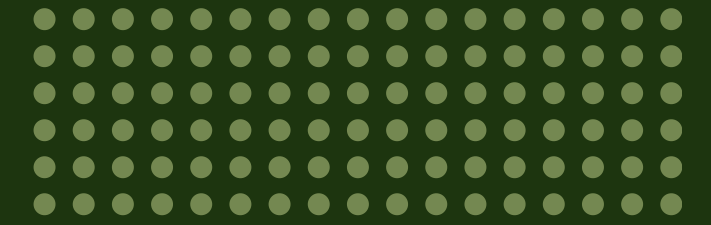

Poles

Robust wooden structures used in electrical systems, telecommunications, and fencing.

Packaging

Essential elements for the storage and transportation of industrial cables, wires, and hoses.

Industrial Packaging

Custom wooden packaging is a tailored solution for the transport and protection of heavy and delicate products.

Designed for export, import, and industrial logistics.

We recently began producing wooden industrial packaging crates, focusing primarily on the export market with wood that meets the quality standards, phytosanitary requirements, and legal documentation necessary for export.

In a world increasingly aware of environmental impact, wood has become the material of choice for many companies as it is eco-friendly, biodegradable, and less polluting than other materials.

Our Goal

To be the trusted manufacturer of wooden packaging for the industry giving our clients custom solutions.

We integrate with our clients' production programs to ensure constant availability, on-time deliveries, and products with uniform quality and markings—offering safe and efficient protection for transporting heavy and delicate goods.

> Custom Design

> Optimal Quality

> Competitive Pricing

Benefits for Our Clients

Damage Reduction

Logistic Efficiency

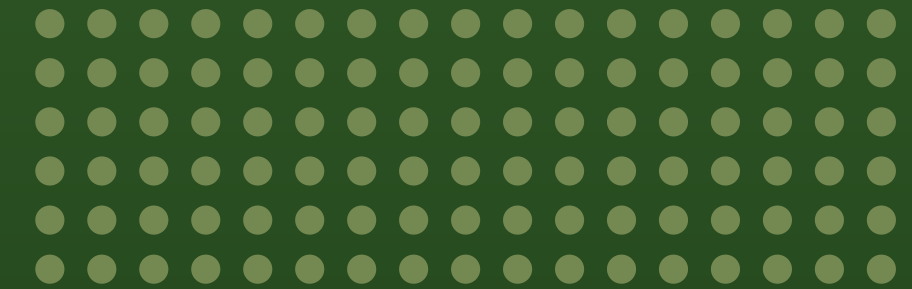

Cost-Benefit

Sustainability

DALL is known for its extensive experience of over 35 years in the wood industry, offering products of the highest quality.

Our personalized service ensures designs adapted to the specific needs of each client, backed by a robust infrastructure that enables us to handle large-volume orders with competitive lead times.

This combination of experience, tailored service, and production efficiency positions us as market leaders.
